Dr Carl Malone's Sinbad 98 AJ Deardorf photo

From the Editor:

Finally—Flying season is upon us. Good weather and longer days will help us all with more time to enjoy our hobby. Contrats to Dr Carl Malone for beating me into the air this past weekend with his Sinbad 98. (Mine is still in the hangar lol). This is an excellent build and obviously a very good flyer. We built our Sinbads to fly at night and that is going to be a very impressive flight. So stand by for some awesome photos then too!

A shout out for ARC Treasurer Scott Bryan who has begun a seasonal task of removing our prolific spread of weeds. Thanks for finding the perfect weed killer Scott. It has done a great job. Thanks also to Gary Jones for spotting this and sharing drone flight pics.

Our monthly business meeting will be this Thursday at Golden Corral at 7PM. Come earlier if you want to eat.

Sinbad 98 by Dr Carl Malone Photos by AJ Deardorf & Carl Malone

Built over 6 months from a Value Planes Laser Cut kit from Redwing RC. This highly complex model has a detailed cockpit, complex lighting system, and several modifications from the standard plans like a custom landing skid, rubber band less wing mount, custom lettering and covered with Neucover. This 5 channel model can be flown as a glider or powered glider with a folding prop such as what Carl has done. Great Job Carl, Full plane builds are rare these days.

Thanks to Scott Bryan We have a weedless pit area. Scott has sprayed our weeds with a killer that he has used in his former lawn business and it did its business on the weeds. Thank you Scott for your work !!!!!
