## Upcoming Events:

Thursday September 4th  
**Angelo RC Club Meeting**  
Golden Corral 7:00 PM

October 10-12  
**West Texas Fly In**  
Angelo RC Field  
San Angelo

Greetings Members!

Well we are about one month away from our annual outdoor Fly-In. If this years' turnout is any thing like last years' we will have a very large turnout of campers on-site. We had great weather for our event last year too. Our evening Pot Luck Dinner was very memorable. We plan to do this again and our members and guests make this possible. Our field looks better than it ever has. Many members' have made this possible this year. Thank you all for the on going work you do for our club and field.

As always I thank Gary for his photos that make our newsletter. Members and readers please submit pictures of your creations. From ARFs to drones to kits and scratch built models, we want to see what you are creating and flying. Please email your pictures to [angelorcflyersatgmail.com](mailto:angelorcflyersatgmail.com) << or just click the link here.

Our monthly business meeting at Golden Corral at 7pm this Thursday. Hope to see ya'll there. Till next month, Safe Flying.

Charlie Campbell Editor \_\_\_\_\_

GARY JONES MAKES THE AUGUST EDITION OF MODEL AVIATION—AGAIN ! !

Gary Jones shows off his foam model that was inspired by the TV series *Stargate*.

## READER RESPONSES

By Terry Dunn | [terrydunn74@gmail.com](mailto:terrydunn74@gmail.com)

**THANKS TO A SURGE** of input from all of you, I have a lot of topics to cover this month, so I'll dive right in.

Gary Jones, of San Angelo, Texas, is known for his collection of unique RC aircraft. Although Gary designs and builds most of his offbeat models himself, his latest oddity had a slightly different genesis. It was designed and built by Reagan May several years ago. Reagan recently gave the airframe to Gary, who then made it airworthy.

If you think this model looks like a spaceship straight from science fiction, that's because it is! Reagan's design is based on the Asgard O'Neill-class ships from the TV series *Stargate*. The completed foam model is 40 inches long, has a 36-inch wingspan, and weighs a little more than 11 ounces. It uses elevons for control. The power system consists of a SunnySky X2204-12 1,800 Kv motor with a 6 x 3 propeller, a SunnySky 18-amp ESC, and a three-cell 800 mAh LiPo battery.

Gary has successfully flown his TV spaceship. He is now working on getting the center of gravity dialed in. You can find video of the *Stargate*-inspired model on Gary's YouTube channel, listed in "Sources."

### Get Ready for Another Unforgettable Weekend!

This year's event is going to be even bigger and better!

Whether you're a returning participant or a first-timer, you're in for a weekend filled with fun, camaraderie, and some amazing flying.

As always, we'll have plenty of space for camping, so bring your tents, RVs, or whatever you prefer for a few days of outdoor adventure. There will be plenty of time for flying, relaxing, and connecting with fellow pilots and enthusiasts.

**Bonus:** *Your pilot fee will include a delicious potluck dinner on Saturday night, where everyone can come together, share a meal, and enjoy great conversation under the stars.*

Mark your calendars, pack your gear, and let's make this year's event the best one yet! We can't wait to see everyone out there for another fantastic weekend of camping, flying, and making memories!

We Can't Wait to See You Soon!

Whether you're arriving early or coming later, we're excited to share the experience with all of you. See you soon for an incredible weekend of camping, flying, and fun! **To pay your landing fee (\$5 per day), simply scan the QR code below.**
